MARK YOSINAO

Full-Stack Software Developer

Seattle, WA · hello@makayotech.com · linkedin.com/in/mark-yosinao · github.com/makayo · mark-yosinao-portfolio.vercel.app

SUMMARY

Full-stack developer completing a BAS in Application Development (June 2027), with internship experience building a 3D data visualization tool in React, TypeScript, and Three.js. Builds web apps with Node.js, REST APIs, PostgreSQL, and Supabase, and applies AI/ML (LLM fine-tuning, RAG), Docker, and AWS. Founder of Makayo Tech LLC.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java, SQL, HTML5, CSS3

Frontend: React, Next.js, React Native, Three.js, Astro, Redux, TanStack Query, Tailwind CSS, responsive design

Backend & Data: Node.js, Express, Django, REST APIs, PostgreSQL, MySQL, Supabase, MongoDB

AI / ML: PyTorch, TensorFlow, Hugging Face, LoRA fine-tuning, RAG, prompt engineering, Jupyter

Cloud & Tools: Docker, AWS, Cloudflare Pages, Vercel, CI/CD, Git, GitHub, Linux, Figma, Agile, code review

EXPERIENCE

Sentient Solutions — Remote

Software Developer Sep 2026 – Present

- Develop and document development infrastructure and tooling for a new project using Docker, Linux, and Git

Software Development Intern Jun 2026 – Sep 2026

Project Orinoco — browser-based 3D data visualization tool for network traffic analysis

- Built an interactive 3D scatter-plot visualizer in React, TypeScript, and Three.js with pivot-point camera controls
- Designed an axis-mapping feature that lets users remap CSV data columns to X, Y, and Z axes without reloading data
- Implemented classification-based point coloring and coordinate tooltips to help analysts interpret network flow data
- Wrote test documentation covering edge cases and fault tolerance for malformed or incomplete datasets
- Delivered features through client feedback cycles, GitHub pull requests, and code review

NSC Tech Hub — Software Developer May 2026 – Present

- Shipped 9 features to a live production website built with Astro and deployed through Cloudflare Pages CI/CD
- Led the Services page redesign and a mobile-first responsive pass; built the shared header, footer, and navigation
- Migrated the contact form from Google Forms to a Slack webhook so inquiries reach the team in real time
- Reviewed and approved pull requests, catching SEO, asset, and merge issues before release; fixed production bugs

Makayo Tech LLC — Founder & Principal · makayotech.com Dec 2025 – Present

- Founded a software company (formerly Makayo Bridge Services LLC) building web apps, AI features, and data systems

PROJECTS

LLM Fine-Tuning with LoRA — Python, PyTorch, Hugging Face

- Fine-tuned T5-small for sentiment classification; evaluated with precision, recall, F1, and confusion matrices

Retrieval-Augmented Generation (RAG) Pipeline — Python

- Built embedding, retrieval, and generation stages to produce grounded answers from a document corpus

EDUCATION

North Seattle College — Bachelor of Applied Science, Application Development Expected Jun 2027

North Seattle College — Associate of Applied Science-T, Application Development Jun 2025

Certifications: AWS Academy Cloud Developing · AWS Academy Generative AI Foundations · NuCamp Front-End Development · HVAC Technician

ADDITIONAL EXPERIENCE

Facilities Technician — Era Living / Ida Culver House Broadview Oct 2016 – Present

Front Desk Greeter (Work-Study) — NSC Opportunity Center 2026 – Present

Operations Associate — Spin; Superpedestrian Oct 2020 – Aug 2022
