Seattle, WA | +1 206 512 5782 | markyosinao@yahoo.com | github.com/makayo | linkedin.com/in/mark-yosinao

EDUCATION

North Seattle College — Bachelor of Applied Science, Application Development *Expected June 2027*

Associate of Applied Science & Technology, Application Development — Completed

HVAC Technician Certification

Front-End Development Certificate & Web Development Fundamentals Certificate — NuCamp Coding Bootcamp

EXPERIENCE

Software Engineering Intern — Sentient Solutions (under Dr. Charles Wheelus) *Jul 2026 – Aug 2026*

Project Orinoco — browser-based 3D data visualization tool, built client-side with React and Three.js

- Built a 3D scatter-plot visualizer with WASD + mouse navigation and click-to-set pivot-point camera controls
- Designed a manual axis-mapping system letting users remap data columns to X/Y/Z axes without reloading the dataset
- Implemented classification-based point coloring and coordinate mouseover tooltips for interpreting flow data
- Authored a testing.md outlining edge-case handling and fault-tolerance checks for malformed or missing dataset fields
- Worked directly with the client and technical advisors through structured feedback cycles, translating requirements into shipped features via GitHub PRs

Software Developer — NSC Tech Hub *May 2026 – Present*

Student-run web development team building and maintaining a live static site in an agile workflow (Astro, Cloudflare Pages)

- Led the redesign of the Services page, implementing an alternating text/image layout with responsive behavior across desktop and mobile
- Built out the global site layout and navigation system (header, footer, mobile menu) shared across all pages
- Identified and fixed multiple production bugs, including a duplicated hero section on the homepage and a broken resume link
- Collaborated with a multi-developer team using GitHub Issues and feature branches, maintaining a clean git history through regular branch review and cleanup

Front Desk Greeter (Work-Study) — North Seattle College Opportunity Center *2026 – Present*

- Serve as first point of contact for students and visitors, balancing front-desk responsibilities alongside coursework and development work

Additional Experience

Facilities Technician — Era Living / Ida Culver House Broadview *Oct 2016 – Present*
Maintain building operations and complete service work orders; assist residents and staff as needed

Operations Associate — Spin *Aug 2021 – Aug 2022*
Performed fleet rebalancing, battery swaps, and asset recovery for electric scooters, adhering to safety and traffic standards

Operations Associate — Superpedestrian *Oct 2020 – Jun 2021*
Handled field pickups/deploys, vehicle operation, and warehouse staging of electric scooter fleet

PROJECTS

LLM Fine-Tuning with LoRA

- Fine-tuned a T5-small model for sentiment classification on the IMDb dataset using Low-Rank Adaptation (LoRA) via HuggingFace
- Evaluated model performance with accuracy, precision, recall, macro F1, and confusion matrix analysis in Jupyter

Retrieval-Augmented Generation (RAG) Pipeline

- Built a Python pipeline that embeds a document corpus and retrieves relevant context to generate grounded answers
- Implemented the embedding, retrieval, and generation stages independently to understand each component of a RAG system

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java, SQL

Frameworks & Libraries: React, React Native, Redux, Django, Bootstrap, Three.js, Node.js, Express, Astro, TanStack Query

AI / ML: TensorFlow, HuggingFace, LoRA Fine-Tuning, RAG, Prompt Engineering

Databases & Tools: PostgreSQL, MySQL, Supabase, MongoDB, Git/GitHub, REST APIs, Figma
